

What is the Magic Painter System?

Magic Painter is a system where painting operation is done without the use of compressed air

Technical Advantages of the Magic Painter system

- Eliminates Paint fog and complete Paint over spray
- Magical Finish on all your products due to warm and dry air produced
- Eliminates any oil and moisture present
- Saves you paint up-to 60% and power up-to 50%
- Gives a transfer efficiency between 85%-90%
- Works well with Robots and Reciprocators

Areas of Application

- Car Wheel Rims
- Plastic parts
- Automotive Components
- Defense Vehicles
- Construction Machinery
- Agricultural Machinery
- Aerospace
- Cell phones
- Laptops etc.
